PALACIO Progress Report

CONTENTS

1. INTRODUCTION

- a. Introduction
- b. Project brief
- c. Project particulars
- d. List of subcontractors

2. EXECUTIVE SUMMARY

a. Project construction main data

3. PROGRESS OVER VIEW

- a. Progress of works
- b. Quality Management
- c. Procurement Management
- d. Safety management

4. PROGRESS PHOTOGRAPHS

1.

a. Introduction

The progress report is an assessment that takes place during a project or process, that conveys details such as what sub-goals have been accomplished, what resources have been expended, what problems have been encountered, and whether the project or process is expected to be completed on time and within budget.

It is intended to be a proactive decision- making document; a separate section on actions and alerts has been highlighted for each action along the due dates.

This report also provides a streamlined analysis of the actual, planned and forecasted events of the project.

The executive summary will provide brief information on the project status.

The general progress overview will provide details on progress achieved to date on the project. The progress that is reported encompasses time, cost, quality, risk, scope, procurement, resources, and safety management.

b. Project Brief

PALACIO Verdun Residence (PR) is located in the heart of Verdun next to The Dunes residence. Palacio affords easy access to all quarters of Beirut and elsewhere. The seafront promenade is only moments walking distance away, the mountains to the east but 20 minutes drive distant.

Northwards and to the south the city's environs are quickly reached via the highway with Rafic Hariri International Airport less than 10 minutes away.

In season, ski on the slopes and water ski off the beach, all within an hour. This key residential and commercial hub provides every amenity for the modern family.

There are banks and supermarkets aplenty, the cities medical facilities, schools and universities within easy reach and urban living fully catered for on your doorstep.

Below are some views of the project's exterior and interior views:

c. Project Particulars

Project Title: Palacio Residence PR Location: Beirut, Lebanon **Mercury Development** MD Owner: Developer: **Ideal Development** ID **Dolmen Contracting Main Contractor:** DC Consultant: **Badih & Kantar Architects** BK **Electromechanical Consultant:** Codeem CDM **Technical Control:**

Socotec

ST

d. List of subcontractors

Below is the list of subcontractors assigned for the supply and execution of all trades:

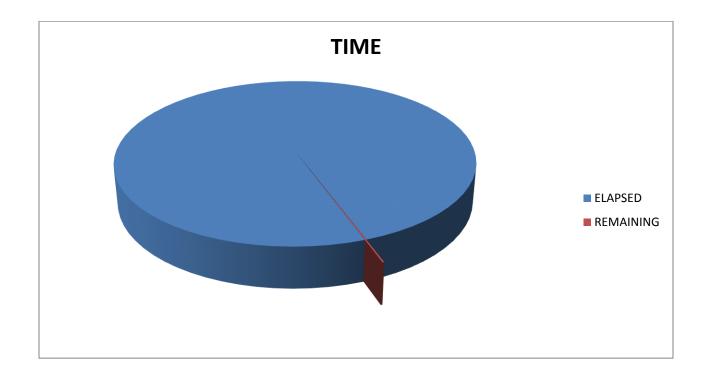

| | Masonry | Yarah Engineering | | |
|----------|--------------------------------|----------------------------------|--|--|
| | Plastering | Yarah Engineering | | |
| | Waterproofing | A-Build | | |
| | Paint | Yarah Engineering | | |
| S | Tiles (ceramic) | RAK Ceramics / Yarah Engineering | | |
| he | Tiles (marble) | AMHabre / Yarah Engineering | | |
| Finishes | Wood doors | Open Door | | |
| 证 | Wood closets | Open door | | |
| | Aluminum and Glass | Glassline | | |
| | Door hardware | Fayad Projects | | |
| | External Cladding | Royal Marble | | |
| | Kitchens | Varenna-Poliform | | |
| | Ducting | AlBina | | |
| | VRV units | Daikin / 22 Degrees | | |
| | Radiators | AlBina | | |
| MEP | Sanitary ware and fixtures | Roca / Tony Emmanuel | | |
| Ξ | Lighting fixtures and fittings | Harb Electric | | |
| | Wiring devices | Harb Electric / Clear | | |
| | Cables | LibanCables / Clear | | |
| | Fans | Harb Electric | | |

2. EXECUTIVE SUMMARY

PROJECT CONSTRUCTION MAIN DATA

| Project name | |
|----------------------------|----------------|
| Project Budget | |
| Project Start Date | |
| Project Finish Date | September 2013 |
| Project Duration | 731 |
| Days Elapsed | 730 |
| Percentage Of days elapsed | 99.8% |

3. PROGRESS OVERVIEW

a. Progress of works

| FLR | DIVISION | TASK | East | West | COMMENTS |
|------------|----------|--------------------------------|------|------|----------|
| | Concrete | Columns | | | |

b. Quality Management

Quality management is now accepted as the way to improve standards Industry's competitiveness and reputation both at home and abroad. Effective and well monitored quality management system ensure that customers (clients) requirements are considered at all stages, guaranteeing good design, reliable performance, prompt delivery and efficient service leading to increased customer confidence and corporate credibility.

The ISO (International Standard organization) standard 9001 is now accepted by all member countries as the basis for certification of quality management systems, and throughout the world companies are introducing and working to this standard.

Many people believe that the standard is only applicable to a manufacturing company, this is not so. It is a management system that can be applied to any organization in any sector of industry or commerce and of any size. Many Administrations, Municipal Authorities, Colleges, and Universities control their operations by the standard and in turn require contractors who work for them to be approved to the standard.

To understand why the standard is being adopted on such large scale, we must first have an appreciation of quality control and quality assurance concepts. Throughout industry and commerce considerable resources are used to inspect and check. Many tasks have to be carried out a second time due to some form of **error detected** by these inspections and checks. Whilst this ensures that eventually the customer or user of the service receives satisfaction, it is obviously **costly** and a **waste of resources**. This approach is **quality control**. An alternative way is to **introduce controls** within the organization to **prevent errors** taking place rather than allowing them to occur and then have to inspect them out at the end. This approach is **quality assurance**.

c. Procurement Management

Procuring goods and services from external suppliers can be a critical path for many projects. Often, the performance of the supplier will reflect on the performance of the overall project team. It's therefore crucial that you manage suppliers' performance carefully, to ensure that they produce deliverables which meet the expectations.

Dolmen Contracting will be producing a detailed procurement report for each project. In addition to the statuses of payments and goods, the report will include a description of any problems with suppliers/subcontractors that may have been encountered during the procurement/purchase processes.

d. Safety Management

OBJECTIVES

The objective of DOLMEN CONTRACTING (DC) is to control or minimize lost time injuries/accidents (LTI/A) in all project operations, and to promote an accident and injury-free (AIF) culture. Our goals are to identify and follow the most suitable and applicable local and international standards in the construction industry within a STEP CHANGE approach and to preserve a safe work environment. Our mission is to protect the Health and Safety of personnel involved in project operations while minimizing damage caused to the environment by controlling the hazards and impacts.

DC has been thoroughly monitoring all necessary procedures and the relevant implementations by the contractor. Simultaneously, ID explained to all project teams, that by complying with the occupational HSE Regulations, they also need to filter down to all laborers and operators and not only be discussed at the executive level. As a general rule, safety is everyone's responsibility throughout the project life cycle.

SUMMARY OF HSE REPORT

Safe Work Procedures that are reasonably practicable have been applied for most of the project activities so far and have minimized the risk of employees' Health, Safety and Environment.

4. PROGRESS PHOTOGHRAPHS

The following section provides some indicative idea on progress of works that were conducted by the main contractor. They are not necessarily demonstrating all activities of works that were carried out during the period of the report.
